Project Description

The aims of this Project are to:

Set up a framework for the sustainable management of Mogumber Farm, the site of the former Moore River Native Settlement, by conducting a natural and cultural heritage survey of Mogumber and incorporating this into a Management Plan outlining NRM actions to be undertaken.

This will be consolidated by conducting capacity and skills building workshops for the Noongar community in collaboration with relevant experts and local officers, to extend Noongar engagement in the project and wider NRM processes and facilitate community change. The workshops will culminate in the creation of a Yued NRM Engagement Document which will support NRM initiatives in the Northern Agricultural Region.

Please note, milestones/outputs for the NRM works to be undertaken in the project's second year will be submitted in March of Year 1, when the Management Plan, including the Implementation Plan has been completed. Because the Plan will indicate what works will need to be undertaken, accurate milestones cannot be provided at this stage
