Project Description

The Flora Identification and Seed Collection workshops were held in Geraldton at the TAFE on the 19th & 20th of November 2009 and were attended by 20 very keen community members. These workshops were oversubscribed so it is very encouraging to see the interest building in the community to learn more about native plants.

A couple of comments of evaluation from the workshop are:

"Well done! Presenter delivered the information / content in a fun, clear, concise manner – related to students and provoked interaction."

"The workshop was wonderful, it was full of information that was delivered with good examples and each area was detailed enough to be informative without being an information overload."
