

# Hidden treasure of NACC - Identification & Prioritisation of Biodiversity Asset Values

**Project Number:** 05N121-02

**Project Start Date:** 1/1/2007

**Project Completion Date:** 30/09/2008

## Project Description

NACC is committed to undertaking strategic projects that will improve the condition of our natural resources. To ensure projects are strategic they will need to be implemented in areas of highest priority. Biodiversity assets in the Northern Agricultural Region are not sufficiently well characterised to allow prioritisation. This project will collect several layers of information to allow the highest priority conservation assets in the NAR to be defined.

This information is an essential first step in the creation of a biodiversity conservation plan, a project that the NACC NRM Strategy has committed to. The research officer will be responsible for preparing the draft NACC Biodiversity Conservation Plan.
