

SITE PLAN STAGE 1 2013-14

Pic 1: First blowout showing significant degradation by off road vehicles

Pic 2: Heavily degraded dune area

Pic 3: Numerous new tracks through dune areas

Legend			
	heavy duty cable fencing		7m wide 200mm thick limestone road
	soft, steep hill warning signage		track to be stabilised with limestone roadbase
	interpretive and information signage		main 4wd track to remain open
	4wd educative signage (deflate tyres)		brushing (local native species only)
	rehabilitation area signage		lot boundaries

Fencing

* Heavy duty cable fencing.

* Interpretive signage to include information on the project with information on flora and fauna and heritage. Sign to include a map showing designated tracks.

* Four wheel drive signage to provide information on tyre pressure, respecting other users, respect for wildlife and vegetation etc. in an informative rather than authoritative manner.

* Rehabilitation area signage to be used along fencing and other strategic locations to discourage entry into rehabilitation area.

* Signage at entrance to blowout to warn ORV users of the risk of not being able to return up the steep, soft hill.

* This site is within a designated aboriginal heritage area.

Access to lighthouse

* A 7m wide and 200mm thick limestone access to be constructed and maintained by Shire of Gingin.

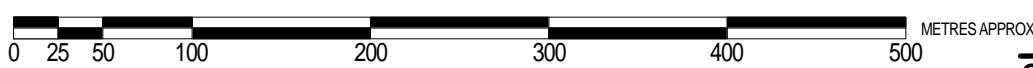

Closed tracks

* The first 20 metres of each closed track is to be brushed.

Main Track

* One track is to be left open allowing access to the first blowout, 3 mile reef and Seabird. Track to remain single lane with passing bays created at regular intervals. The south side of the hill (indicated on plan) to be stabilised with limestone roadbase and maintained to prevent degradation by 4wd use.
